## PROJECTS

---

### **Volunteer Go** · [GitHub](#)

A platform for volunteers and non-profit organizations to find and manage requests for nearby opportunities. Backend built using Express and Node.js. Front-end built with the [Google Maps API](#), React.js and CSS3.

### **Feathers** · [GitHub](#) · [Live](#)

Demo lead and co-project manager on a team for a full stack application that pairs solo travelers with one another based on their characteristics and travel partner preferences. Used Express and Node.js to develop API endpoints and set up database using PostgreSQL. Overhauled UI based on user-testing feedback.

### **VACCessNYC** · [GitHub](#) · [Live](#)

Application that helps local New Yorkers find flu vaccination centers near them using an [NYC Open Data API](#). Built using React.js, HTML5, CSS3, and Google-Map-React during Pursuit's annual hackathon.
