PROJECTS

VolunteerGo | [GitHub](#)

A platform for two separate user groups: volunteers to find and send requests for opportunities near them, and non-profit organizations that can approve or decline these requests. Built backend using Express and Node.js. Front-end functionalities and styling were built with the [Google Maps API](#), React.js and CSS3.

Feathers | [GitHub](#) | [Live](#)

A full stack application that pairs solo travelers with one another based on their characteristics and travel partner preferences. Used Express and Node.js to develop API endpoints and set-up database using PostgreSQL. Overhauled UI based on user-testing feedback. Demo-ed app for an audience at Venmo.

VACCessNYC | [GitHub](#) | [Live](#)

Application that helps local New Yorkers find flu vaccination centers near them using an [NYC OpenData API](#). Built using Javascript, React.js, HTML5/CSS3, and Google-Map-React during Pursuit's annual hackathon.
